

Cipatex PVC Geomembranes

The best thing about working with Cipatex 0.75mm PVC liner?

It could be the large sheet size - pre-fabricated in the factory to 10.8m x 100m, minimising on-site seaming.

It could be the complete flexibility of PVC which means the sheet conforms to any irregular and undulating shape.

It could be ability to either heat weld or glue the sheet, making pipe penetrations a breeze.

Or it could be fact that it is priced under \$6.00/sqm, making PVC simply the best, lowest cost lining solution.
