

# Cipatex PVC Geomembrane

Cipatex PVC geomembrane is ideal for a wide range of civil applications. At the new Plumbing Industry Training Centre at Narre Warren, Hutchinson Builders used 0.75mm PVC Cipatex to line a large raingarden. The 10.8m wide panel size allowed coverage in one piece, minimising any on-site seaming. The flexibility and toughness of PVC allowed the liner to easily follow the shaped profile.
