

Jute Mat

Jute Mat is a needle-punched, high-density matting made from natural 100% biodegradable, natural beige-coloured jute fibre. The jute fibre is needle-punched onto a light hessian scrim. Jute Mat forms a natural mulch mat, retaining soil moisture and helps prevent soil erosion. Heavy Jute Mat acts as a weed suppressant, whilst light jute is used to promote grass seed germination to promote grass growth.

Heavy Jute Mat is available with 5 slits/sqm and also without slits.

Applications include lining of open stormwater channels, earthen embankments, around wetlands and for general landscaping.

Jute Mat is to be securely pinned down with 2-3 pins per sqm. In areas subject to water flow, mat should be shingled in the direction of water flow.

Product Grade	Unit Mass	Roll Size
Jute Mat Heavy	750gsm	1.83m x 25m
Jute Mat Light	330gsm	2.00m x 50m
Pins, 200mm plain steel	500 no./box	2-3/sqm
