

# DUX polyester geogrids

**DUX** high-strength polyester geogrid finds wide usage in reinforced soil applications including modular block retaining wall systems, embankment repair and gabion-faced walls.

SGS is also known for its Green Wall system that makes use of a simple steel mesh lost formwork face combined with **DUX** soil reinforcement. The flexibility of **DUX** polyester geogrids make them easy to work with, and easy to form wrap-a-round face structures. SGS supplies the complete package of gabions and geogrid, as well as free design assistance.
